

## **Tampa Bay Polymer Art Guild Spring 2007 Workshop**

### **Lathe Turning Polymer Clay by Grant Diffendaffer**

"Have you ever seen polymer clay fly through the air like silly string? You will, and it will change the way you think about polymer clay forever. Learn to shape both raw and cured polymer on a simple lathe. This class will focus on making bead forms using a succession of multiple curing cycles and lathe work. Making beads with perfect symmetry, rich surface patterns, and beautiful finishes has never been so easy. Join us for a day of fun and excitement. You'll be amazed as incredible beads magically take shape under your hands."

Examples of his lathe turned textured beads are on his website

<http://www.diffendaffer.com>

Location: Clearwater Martin Luther King Library

Date: March 20, 2007 (10:00 – 5:00)

Cost: \$55 for paid members of Tampa Bay Polymer Art Guild, Ocala Guild, and Orlando Guild.

Non-guild members fee is \$70 for the one day workshop providing there are seats. There will be a small materials fee of approx \$8 payable to Grant before the workshop.

Make payable to TBPAG and send it to

Karen Woods 17606 Lake Key Dr Odessa Fl. 33556

Questions call Karen at 813-920-7373

Grant is also teaching for Florida Tropical Weavers Conference March 21-24, 2007, a 3 day workshop on his marvelous mica and his textured bead techniques.

The updated 2007 conference information for FTWG should be on their website by November.
